

April 12, 2020

Greetings!

Here's hoping and praying you are staying healthy and happy in this "interesting" time we're in at the moment!

It is with great pleasure and excitement that I announce [323 Construction](#) recently entered into a strategic partnership with [TransTech Energy](#). If you are not familiar with TransTech, they are one of the leading providers of LPG and NGL storage solutions in the country, as well as a manufacturer of AMSE storage and process vessels for the oil and gas industry. TransTech is headquartered in North Carolina, and also has offices in Texas and Ohio. 323's office in Missoula, Montana will now serve as the hub for TransTech's newly formed Western Region Operations.

323 Construction and TransTech share many similarities, including our family-oriented approach to running our businesses and an unwavering commitment to always provide the highest level of Quality, Safety and Integrity on every project, no matter how small or how big the project might be.

I look forward to continuing to support my numerous clients in the Western US, but now being able to provide a wider array of capabilities. Our combined offering is going to allow us to provide a level of products and services previously unmatched in the region. From enhanced engineering and construction capabilities, to expanded geographic support, and access to the largest inventory of new, used and custom fabricated storage tanks and equipment in the country, we look forward to setting a new standard of support in the region.

Please note that my phone number will stay the same (406-240-9152) and my new email will be vfink@transtechenergy.com. My vicfink323@msn.com email account will be active for a period of time.

I hope to see you again soon when things get back to normal. In the meantime, I would love the opportunity to connect for a video meeting to share more with you about my new venture. If there are any upcoming project's or tank/equipment needs that we can support you with, please don't hesitate to give me a call.

Again, Stay Safe & Well!

Vic Fink
Western Region Director
