

TMS is pleased to announce the launch of its newest product: TMS VPD (Volumetric Propane Dispenser). This unit combines true volumetric dispensing with tank level information to manage inventory and wireless transmission of transaction data back to office systems.

Created to show the true amount of propane dispensed for small cylinders (5-100lbs), the TMS VPD combines mass and volume measuring technologies to ensure safe and accurate dispensing. This new product will allow retailers to offer their customers real savings and will help manage dispensing and inventory operations.

The system uses industry leading products from Veeder-Root™, Interweigh Systems™, Dayco™ and Tuthill™. Tying it all together is a customized TMS Datalink software package based on the TMS6000 suite of software products highly regarded across North America

### Features of the software platform:

- Track Volumetric Data (Sales, Inventory)
- Display in either Liters or Gallons
- All Prompts Multi-Lingual
- On screen tank levels
- Customized Ticket
- Manager Reports
- Authentication & Security
  - Client card authorization
  - Overfill cut off protection
  - Tank expiry feature
  - Emergency stop
- Office software for data capture
- Three Data Transmission Options (900Mhz Wireless, USB, Ethernet)

### Features of the hardware platform:

- Built to NSC Standard B149.2-M91
- Rugged frame suited for all environments
- Hose hanger with 6' filling hose
- Industry standard filling connections
- Integrated alpha-numeric keypad
- Variable piping (side or rear piped)
- Single or dual scale position available
- Compliances
  - NIST/W&M
  - DOT/MOT
  - EPA/MOE
  - Pending CSA approval

CELEBRATING 30 YEARS OF INNOVATION

## Key Benefits

### Learning Curve

- Very Short
- Easily Learned
- Easy to use - Authenticate, tare and start

### Scalability

- Up to 2 scales per pedestal
- Unlimited pedestals can be linked together via office software

### Fair Measure

- Pay for actual volume dispensed

### Shrinkage reduction

- TLS inventory control and reconciliation
- Integration to back office system
- Office software

### High ROI

- Low cost of technology
- Off the shelf components
- Less clerical & data entry errors, lost paperwork, receipts
- No need for high priced computer service specialists
- Increase customer satisfaction

### Low cost maintenance and less down time

- Plug and Play Components
- Windows Based Operating System
- All components available across North America
